## DETAILED ACTION

### *Claim Objections*

1. Claim 2 is objected to because of the following informalities: line 4, "siad" should be "said".

Appropriate correction is required.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1 and 2 are rejected under 35 U.S.C. 102(e) as being anticipated by Stripe (US Patent 6,287,508). Stripe discloses filling a tubular preform (22) with a heated fluid under pressure, bending the preform with spool elements (46) and circulating a cooling fluid through the preform (column 5, lines 25-66).

### *Claim Rejections - 35 USC § 103*

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Stripe (US Patent 6,287,508) in view of Obsomer (US Patent 4,499,045). Stripe teaches filling a tubular preform (22) with a heated fluid under pressure, bending the preform with spool elements (46) and circulating a cooling fluid

through the preform (column 5, lines 25-66). Stripe does not teach that the heated fluid is a vapor. Obsomer teaches reshaping a tube by means of a heated fluid, which may be steam or compressed air and steam, among others (column 3, lines 29-43). It would have been obvious to a person of ordinary skill in the art at the time of the invention to use the fluid taught by Obsomer to modify the method taught by Stripe, in order to use a cheaper and more available fluid, to quickly heat and shape the preform.

### ***Allowable Subject Matter***

6. Claim 3 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
7. Claims 4-6 and 8-11 are allowed.
8. The following is an examiner's statement of reasons for allowance: the prior art does not teach or fairly suggest, in a method of producing a flexible resin hose by using a high temperature and high pressure fluid to heat and pressurize the hose, bending the hose and cooling the hose by allowing cold temperature fluid into the hose, the steps of providing a hose with a corrugated portion and bending the corrugated portion.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Riley et al. (US Patent 4,428,900).
10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Suzanne E. McDowell whose telephone number is (571) 272-1205. The examiner can normally be reached on M-F 6:30-4.
